The purpose of this inspection was to conduct a Follow up inspection.

This inspection was conducted on the following date(s): July 10, 2015

An inspection (2014-189120-0016) was previously conducted on March 5 & 6, 2014 at which time Orders were issued for non-compliance related to door security (Order #001) and lighting (Order #003). A follow up inspection (2015-189120-0029) was conducted on April 22, 2015 and the conditions laid out in the two Orders were not fully complied with. For this follow-up visit, both Orders have been complied with.

During the course of the inspection, the inspector(s) spoke with the Administrator and maintenance person. The Inspector randomly selected several resident bedrooms and took illumination readings using a light meter and tested several stairwell doors on each floor to confirm the installation and function of back-up alarms at each door.

**The following Inspection Protocols were used during this inspection:

1. The licensee did not ensure that the lighting requirements set out in the lighting table were maintained.

The home was built prior to 2009 and therefore the section of the lighting table that applies is titled "All other homes". Illumination levels were measured using a portable light meter (Sekonic Handi Lumi) held 30-36 inches above and parallel to the floor. The licensee was previously required to upgrade lighting levels and add additional light fixtures in resident bedrooms. Resident bedrooms were noted to be equipped with an entrance light fixture during an inspection on March 5, 2014, prior to the resident bedroom lighting upgrades. The fixtures however were removed since that time and the illumination levels into the bedrooms were found to be non-compliant. Bedrooms #213 and #302 were measured from the entrance to the room and for 7 feet into the room. The section was 100 lux instead of a minimum of 215.28 lux. The general bedroom lighting however was compliant with the addition of 2 ceiling mounted light fixtures. [s. 18]
