The purpose of this inspection was to conduct a Follow up inspection.

This inspection was conducted on the following date(s): September 15 - 18, 2015

The following Follow-up Inspections were conducted concurrently during this inspection:

Log # 019226-15/Follow-up to RQI inspection number 2015_171155_0015/L-002224-15, CO #003 and #006

Log # 019230-15/Follow-up to RQI inspection number 2015_171155_0015/L-002224-15, CO #002 and #005

During the course of the inspection, the inspector(s) spoke with the Administrator, the Assistant Director of Nursing, the Resident Assessment Instrument Coordinator, the Maintenance Manager, two Personal Support Workers, one Registered Practical Nurse, one Family Member and two Residents.

The inspector also conducted a tour of the home and made observations of exterior windows and resident care. Relevant policies and procedures, as well as clinical records, bed entrapment audits, assessments and plans of care for identified residents were reviewed. Inspector observed meal and snack service, resident - staff interactions and reviewed the continence care products and staff schedules.

The following Inspection Protocols were used during this inspection:

**WN #1: The Licensee has failed to comply with O.Reg 79/10, s. 15. Bed rails
Specifically failed to comply with the following:**

- s. 15. (1) Every licensee of a long-term care home shall ensure that where bed rails are used,**
- (a) the resident is assessed and his or her bed system is evaluated in accordance with evidence-based practices and, if there are none, in accordance with prevailing practices, to minimize risk to the resident; O. Reg. 79/10, s. 15 (1).**
 - (b) steps are taken to prevent resident entrapment, taking into consideration all potential zones of entrapment; and O. Reg. 79/10, s. 15 (1).**
 - (c) other safety issues related to the use of bed rails are addressed, including height and latch reliability. O. Reg. 79/10, s. 15 (1).**

Findings/Faits saillants :

1. The licensee has failed to ensure that where bed rails were used, the resident was assessed and his or her bed system evaluated in accordance with evidence-based practices, and if there are none, in accordance with prevailing practices to minimize risk to the resident and steps were taken to prevent resident entrapment, taking into consideration all potential zones of entrapment.

Record review of the "Tool 2: Bedrail Risk Assessments" revealed an assessment was completed for all residents identified as using one or more bed rails on the Bed Rail inventory list. The "Tool 2: Bedrail Risk Assessments" did not identify which bed system the resident was assessed in and observation of random bed systems revealed inconsistent bed frame and mattress numbers as compared to the "Facility Entrapment Inspection Sheets."

When there was a change to a resident's bed system with use of bed rails, the resident was not reassessed. This was confirmed by the Administrator and the Maintenance Manager. The Facility Entrapment Inspection Sheet was not completed when a change in the resident's bed system occurred.

The Administrator confirmed it was the home's expectation that each bed system have a different bed frame number and mattress number to identify the appropriate mattress with the appropriate bed frame and to ensure the entire system was documented

accurately.

Comparing the bed system as it was documented using the Facility Entrapment Inspection Sheet to observations made on September 17, 2015 of three random bed systems revealed the description on the sheet did not match the actual beds in the room.

Random room audits for one resident in each of the three home care areas to identify the use of bed rails as described on the "Tool 2: Bedrail Risk Assessment" revealed the description in the assessment did not match the actual use of bed rails by the residents or other assessments in the plan of care.

Staff interview with the Resident Assessment Instrument Coordinator, the Maintenance Manager and the Administrator on September 17, 2015 confirmed where bed rails are used, the resident needs to be assessed and the information accurately documented related to the bed system evaluation. The Administrator confirmed steps were not taken to prevent resident entrapment related to loose rails not tightened routinely to minimize risk for one resident and confirmed the "Tool 2: Bedrail Risk Assessments" did not identify which bed system the residents were assessed in.

This area of non-compliance was previously issued as a compliance order with a compliance date of September 8, 2015. [s. 15. (1)]

Additional Required Actions:

CO # - 001 will be served on the licensee. Refer to the "Order(s) of the Inspector".

The licensee must achieve compliance to ensure when bed rails are used,

- (a) the resident is assessed and his or her bed system is evaluated in accordance with evidence-based practices and, if there are none, in accordance with prevailing practices, to minimize risk to the resident and
- (b) steps are taken to prevent resident entrapment, taking into consideration all potential zones of entrapment. O.Reg. 79/10, s. 15 (1) (a)(b).

The licensee must prepare, submit and implement a plan for achieving compliance with O.Reg. 79/10, s. 15 (1) (a)(b).

The plan must include the following:

1. Reassessment of all residents in the home and their bed system including time line and person(s) responsible
2. A method of tracking and updating the Bed Rails Inventory List and Bed Rail Risk Assessment to ensure information is accurate and current at all times.

Please submit the plan, in writing, to Melanie Northey, Long Term Care Homes Inspector,

Grounds / Motifs :

1. 1. The licensee has failed to ensure that where bed rails were used, the resident was assessed and his or her bed system evaluated in accordance with evidence-based practices, and if there are none, in accordance with prevailing practices to minimize risk to the resident and steps were taken to prevent resident entrapment, taking into consideration all potential zones of entrapment.

The "Tool 2: Bedrail Risk Assessments" did not identify which bed system the resident was assessed in and observation of random bed systems revealed inconsistent bed frame and mattress numbers as compared to the "Facility Entrapment Inspection Sheets."

When there was a change to a resident's bed system with use of bed rails, the

resident was not reassessed. This was confirmed by the Administrator and the Maintenance Manager. The Facility Entrapment Inspection Sheet was not completed when a change in the resident's bed system occurred.

The Administrator confirmed it was the home's expectation that each bed system have a different bed frame number and mattress number to identify the appropriate mattress with the appropriate bed frame and to ensure the entire system was documented accurately.

Comparing the bed system as it was documented using the Facility Entrapment Inspection Sheet to observations made on September 17, 2015 of three random bed systems revealed the description on the sheet did not match the actual beds in the room.

Random room audits for one resident in each of the three home care areas to identify the use of bed rails as described on the "Tool 2: Bedrail Risk Assessment" revealed the description in the assessment did not match the actual use of bed rails by the residents or other assessments in the plan of care.

Staff interview with the Resident Assessment Instrument Coordinator, the Maintenance Manager and the Administrator on September 17, 2015 confirmed where bed rails are used, the resident needs to be assessed and the information accurately documented related to the bed system evaluation. The Administrator confirmed steps were not taken to prevent resident entrapment related to loose rails not tightened routinely to minimize risk for one resident and confirmed the "Tool 2: Bedrail Risk Assessments" did not identify which bed system the residents were assessed in.

This area of non-compliance was previously issued as a compliance order with a compliance date of September 8, 2015. [s. 15. (1)] (563)
