WN #1: The Licensee has failed to comply with O.Reg 79/10, s. 49. Falls prevention and management

Specifically failed to comply with the following subsections:

s. 49. (2) Every licensee of a long-term care home shall ensure that when a resident has fallen, the resident is assessed and that where the condition or circumstances of the resident require, a post-fall assessment is conducted using a clinically appropriate assessment instrument that is specifically designed for falls. O. Reg. 79/10, s. 49 (2).

Findings/Faits saillants :

1. Staff interview with Director of Care revealed the home does not complete an assessment using a clinically appropriate assessment instrument that is specifically designed for falls when a resident has fallen, in place at this time. As part of their Resident First Initiative this gap was identified and a tool is to be implemented on Dec. 3, 2012.

Chart review of a specific resident did not reveal the use of clinically appropriate assessment instrument that is specifically designed for falls being used to assess a resident after a fall.
