**Findings/Faits saillants :**

1. The licensee failed to ensure that strategies were developed and implemented to respond to the resident demonstrating responsive behaviours, where possible when the following occurred:

Resident #01 had been exhibiting escalating responsive behaviours related to staff assisting resident with their personal care. Resident was frequently refusing personal care assistance from staff.

Record review revealed resident responded well to having one staff member on the unit assist resident with their personal care.

In an interview with Registered Staff, she confirmed that one staff member had been successful with resident's personal care and they should have been scheduling the resident's care when that staff member works.

During an interview the Director of Care confirmed her expectation that when strategies are developed for residents demonstrating responsive behaviours they be implemented, ensuring residents personal hygiene and bathing needs are met. [s. 53. (4) (b)]
