During the Resident Quality Inspection the following issues were observed:

Nine resident rooms and Cherry Lane Hall were found to have paint chips, wall damage, unfinished drywall repairs or areas missing ceramic tile baseboard.

Dining room doors were heavily marked with black scuffs.

Identified resident rooms with a broken towel rack, broken light fixture, two covers missing off wall mount radiators, two mattresses were heavily worn and cracked and four resident rooms with multiple light bulbs burnt out.

Inspector observed a resident room window and the Assisted Dining Room window stoppers had been removed from windows allowing them to open greater than 15 cm.

Inspector observed one resident room call bell system not functioning properly when tested and another resident room call bell system not functioning properly when tested and that had been pulled away from the wall.

Light bulbs and window stoppers were immediately replaced, and call bell system repaired by maintenance when brought to the homes attention.

These issues were confirmed by staff.

The Director of Care confirmed it is the home's expectation that the home, furnishings and equipment are maintained in a safe condition and in a good state of repair. (518) [s. 15. (2) (c)]

Additional Required Actions:

CO # - 001 will be served on the licensee. Refer to the “Order(s) of the Inspector”.

Findings/Faits saillants :

1. The licensee has failed to ensure that staff participate in the implementation of the infection prevention and control program.

During stage one of this Resident Quality Inspection the following was observed:

Two resident rooms with soiled privacy curtains, ten unlabelled toothbrushes were found in shared or semi private washrooms, four resident rooms with dried debris on the toilet seat or stained or unclean toilet bowls, one resident room with garbage on the bathroom floor, and a large bright pink stain in the bathroom sink, two resident rooms with soiled garbage but no garbage bags in them, one resident room with stains on the bathroom floor, one resident room with a brown coloured substance splattered and dried on the lower part of the wall, one resident room with a commode chair with urine and paper in it, and a garbage pail with a bag in it containing a soiled incontinent product, and three resident rooms with urinals covered with a white hand towel on the back of the toilet tank.

Plan of care**

Specifically failed to comply with the following:

s. 6. (2) The licensee shall ensure that the care set out in the plan of care is based on an assessment of the resident and the needs and preferences of that resident. 2007, c. 8, s. 6 (2).

Findings/Faits saillants :

1. The licensee has failed to ensure that care set out in the plan of care is based on an assessment and use of a Personal Assistance Service Device(PASD), for Resident #1.

The resident was observed utilizing a PASD throughout the inspection. One staff confirmed the use of the PASD, however a PASD assessment was not completed.

A review of the clinical record reveals requirements for the use of a PASD have not been included in the plan of care.

The homes Minimizing Restraint Program Policy and Procedure revised May 2015 related to Use of Personal Assistance Service Devices(PASDs) provides procedures for assessment that have not been complied with.

The procedure for PASD Assessment indicates:

This assessment is carried out collaboratively by an interdisciplinary team.

The care plan must include a description of the device that is being authorized and instructions relating to the order: purpose, when it will be used, how it will be used, how long it will be used, duration and frequency of use.

The Administrator confirms that all PASDs are to be assessed according to the homes policy and ministry legislation. [s. 6. (2)]
