WN #1: The Licensee has failed to comply with O.Reg 79/10, s. 18. Every licensee of a long-term care home shall ensure that the lighting requirements set out in the Table to this section are maintained. O. Reg. 79/10, s. 18.

Reg. 79/10, s. 18, Table; O. Reg. 363/11, s. 4****Findings/Faits saillants :**

1. The licensee has failed to ensure that lighting requirements set out in the table are met in all areas of the home, including residents' bedrooms.

On December 11, 2014 illumination levels were checked in resident areas of the home by Inspector 102. A hand held GE light meter was used. The meter was held 3 to 4 feet above the floor surface with all available electric light fixtures turned on and "warmed up". In residents' bedrooms, window coverings were closed and privacy curtains, where provided, were open when light levels were measured.

Levels of lighting in all residents' bedrooms were less than 50% to 75% of the required lighting level of 215.28 lux, unless immediately underneath or in close proximity to the provided wall mounted, over bed, florescent light fixtures.

It was identified that the illumination level at the bed reading position in residents' bedrooms, was compliant at the time of the inspection.

Low levels of lighting are a potential risk to the health, comfort, safety and well being of residents. Insufficient lighting levels may negatively impact the ability of staff to clean effectively and to deliver safe and effective care to residents including: the distribution or application of prescribed drugs and treatments; to conduct assessments; to provide treatments. Low levels of illumination and shadows may negatively impact residents' perception of the surrounding environment affecting mobility, nutritional intake, and overall quality of life. [s. 18.]

Additional Required Actions:

CO # - 001 will be served on the licensee. Refer to the "Order(s) of the Inspector".
