Rapport d'inspection sous la Loi de 2007 sur les foyers de soins de longue durée

Findings/Faits saillants :

1. The licensee has failed to ensure that the plan of care was reviewed and revised at least every six months and at any other time when care set out in the plan has not been effective.

The document the home referred to as the care plan, had a focus of potential for injury for resident #001, with a specific intervention identified. The intervention directed staff to monitor the resident and to take specific actions that would ensure the resident's activities did not compromise the resident's safety. Several staff reported that they were aware the resident often reversed the actions they employed, to ensure safety, which put the resident at risk. On an identified date, there was an incident that resulted in injury to the resident. However, in the eleven weeks between when the intervention was initially implemented and the date of the incident, no other interventions to ensure the resident's safety, were implemented. This was confirmed by the DRC. The care plan was not revised when staff were aware the care set out in the plan of care, had not been effective. [s. 6. (10) (c)]

Additional Required Actions:

CO # - 001 will be served on the licensee. Refer to the “Order(s) of the Inspector”.

RT Respiratory Services is contracted by the home to provide home oxygen for the residents. Policy number 34, titled Oxygen Safety, issued September 1, 1999, and revised February 26, 2013, directed that when oxygen is in use, a no smoking sign would be placed in a clearly visible location and open flame would not be allowed near anyone using oxygen therapy. Open flame included cigarettes.

As confirmed by the Director of Resident Care (DRC), a 'no smoking' sign was not placed in a clearly visible location, for the portable oxygen tank of an identified resident. The home's policy was not complied with. [s. 8. (1) (b)]

Additional Required Actions:

1. The licensee has failed to ensure that any actions taken with respect to a resident under a program, including assessments, reassessments, interventions and responses to interventions were documented.

At the time of interview, registered staff #001 reported to the inspector that there was significant assessment, discussion and planning related to the activities and therapeutic treatments of resident #001. The care plan was updated to include that staff would take specific actions related to the resident's treatment, when the resident was pursuing identified activities. Subsequent reassessment and discussion took place when staff realized resident #001 reversed the staff's interventions during identified activities. Review of the clinical record revealed no documentation related to the resident's response to the intervention, assessment, reassessment or planning outlined above. The Administrator confirmed the resident's response to the intervention, assessment, reassessment and planning related to the identified activities of resident #001, were not documented. [s. 30.
