- 1) Ensure that all recommendations made from the contractor's generator inspection on March 5, 2026 are completed.
- 2) If not included in the above, fully repair the damaged generator component issue.
- 3) Complete a full load generator inspection and obtain full certification as per the contractor's requirements for annual inspection.
- 4) Maintain a record of any quotes obtained, inspection reports, maintenance logs, and the certificate showing certification during the period this order is served until the order is complied.

### Grounds

The home's generator had a damaged component for an extended period. No action was taken despite the contractor recommending repair. As a result, the contractor was unable to complete an annual test required for scheduled maintenance and to certify the generator. The damaged component presented a safety risk and risk of critical damage to the generator if left to worsen.

**Sources:** Observation of the home's generator; Review of contractor service documentation and the home's generator maintenance policy; Interview with home staff and multiple contractor employees.

**This order must be complied with by April 20, 2026**
