Findings/Faits saillants :

**Inspection Report under
the Long-Term Care
Homes Act, 2007****Rapport d'inspection en vertu de
la Loi de 2007 sur les foyers de
soins de longue durée**

The licensee shall ensure that the Director is informed of an incident in the home no later than one business day after the occurrence followed by the report required under subsection (4): an incident that causes an injury to a resident that results in a significant change in the resident's health condition and for which the resident is taken to a hospital.

A Critical Incident Report (CIR) was submitted to the Director, reporting an incident for which an identified resident was taken to the hospital and which resulted in a significant change to that resident.

Review of the CIR documentation indicated that PSW #101 heard a loud bang from an identified resident's room. The PSW entered the resident's room and observed that the resident had experienced a fall. The resident was assessed by RN #103 and an analgesic medication was administered to the resident for discomfort related to the fall. The resident continued to experience increased discomfort and was transferred to the hospital for further assessment.

On a specified date an identified resident experienced a fall and was transferred to the hospital with an injury which resulted in a significant change to that resident. The Director was notified of the incident six days after the resident's fall.

The licensee failed to ensure that the Director was informed of an incident in the home no later than one business day after the occurrence of the incident which caused an injury to an identified resident that resulted in a significant change to the resident's health condition and for which the resident was taken to the hospital.
