WN #1: The Licensee has failed to comply with LTCHA, 2007 S.O. 2007, c.8, s. 6. Plan of care

Specifically failed to comply with the following:

- s. 6. (1) Every licensee of a long-term care home shall ensure that there is a written plan of care for each resident that sets out,**
- (a) the planned care for the resident; 2007, c. 8, s. 6 (1).**
 - (b) the goals the care is intended to achieve; and 2007, c. 8, s. 6 (1).**
 - (c) clear directions to staff and others who provide direct care to the resident. 2007, c. 8, s. 6 (1).**

Findings/Faits saillants :

1. The licensee has failed to ensure the written plan of care for resident #007 set out clear directions to staff and others who provided direct care to the resident.

Inspector #642 conducted a Follow up inspection to CO #002 which was served to the Licensee, under inspection report #2016_283542_0005. The CO required the home to do the following by the end of December, 2016:

"The licensee shall ensure that resident #006's plan of care sets out clear directions to staff and others who provide direct care. Specifically the licensee shall ensure the following is completed for resident #006;

- a) ensure that the plan of care provides clear direction with regards to the all restraints used for resident #006
- b) ensure that restraint consents and physician's orders are current and specific for resident #006."

The Licensee was in compliance with this order however new additional non-compliance was identified during this inspection related to plan of care. During this Follow up inspection, Inspector #642 reviewed a document for resident #007 titled "Bed System Entrapment Risk Assessment (March 2016)," dated in February, 2017 and checked off under section F. (1.) it stated "No bed rails used." This document was reviewed with the Director of Patient Care (DOPC) on June 23, 2017 and they stated that the plan was for the resident to not have bed rails.

Inspector reviewed resident #007's most up to date written care plan dated in June, 2017, and under interventions for the risk of falls it stated, "Do not use 2 side rails. Resident uses two top bed rails only."

Inspector reviewed the resident's electronic copy of the Resident Assessment Protocols (RAPS) report dated in June, 2017. When resident #007 was in bed, staff were to use both upper rails only and resident relied on staff for assistance.

Inspector #642 observed the unit for four days in June, 2017 and resident #007 had only one upper bed rail on the window side in the up position during this inspection.

Inspector reviewed resident #007's daily paper flow chart titled "Seven Day Observation & Monitoring Form" dated in June, 2017. The RPNs or PSWs sign this form daily after providing resident care. Under section "P) Devices and Restraints: # of bedrails used", it

was documented that resident #007 had used two bed rails at night for five nights in June, 2017, and during the day for three days in June, 2017. Inspector #642 observed the unit for two days in June, 2017, and had observed one upper bed rail in use for resident #007 while they were in bed.

Inspector interviewed RPN #102 who stated that resident #007 uses upper bed rails and RPN #102 stated that the one bed rail was up on the window side but "technically they do not need it."

Inspector #642 interviewed the DOPC on June 30, 2017 on the telephone and they stated that for resident #007 the plan of care did not provide clear direction for all staff and others who provide care. [s. 6. (1) (c)]
