7. The licensee shall ensure that the care set out in the plan of care is provided to the resident as specified in the plan.

Findings:

1. The resident had a plan of care that identified staff was to check him/her at least every two hours and, if needed, to provide assistance to change his/her incontinence product.

2. Three personal support workers stated that their provision of care to the resident entailed checking and potentially changing his/her incontinence product at the time of morning care (0800-1000) and when he/she returned to bed after lunch (1300-1330). This exceeded the two hour timeframe specified in the resident's plan of care.

3. The resident's plan of care indicated that he/she was a two person mechanical lift transfer.

4. Three personal support workers reported that the resident's transfer from wheelchair to commode was not done using the mechanical lift.

(4) Every licensee of a long-term care home shall ensure that, for each resident demonstrating responsive behaviours,

- (a) the behavioural triggers for the resident are identified, where possible
- (b) strategies are developed and implemented to respond to these behaviours, where possible; and
- (c) actions are taken to respond to the needs of the resident, including assessments, reassessments and interventions and that the resident's responses to interventions are documented.

Findings:

1. There are documented incidents of the resident refusing care as well as becoming verbally and/or physically abusive with staff during the delivery of care.

2.A Dementia Observation System assessment was initiated on July 4, 2010. This system would collect information regarding resident activities at each hour of the day and could be used to identify patterns or triggers of the resident's responsive behaviours. There was no evidence of analysis of the data.

3. The resident's family and the registered nurse reported that pain may have been a trigger contributing to his/her refusal of morning care and his/her response of verbal and/or physical abuse. No pain assessment had been completed. The resident was verbally and/or physically abusive or refused morning care on a number of occasions in July 2010.
