The following constitutes written notification of non-compliance under paragraph 1 of section 152 of the LTCHA.

Le non-respect des exigences de la Loi de 2007 sur les foyers de soins de longue durée (LFSLD) a été constaté. (une exigence de la loi comprend les exigences qui font partie des éléments énumérés dans la définition de « exigence prévue par la présente loi », au paragraphe 2(1) de la LFSLD).

Ce qui suit constitue un avis écrit de non-respect aux termes du paragraphe 1 de l'article 152 de la LFSLD.

1. The licensee has failed to ensure that there was at least one Registered Nurse who is an employee of the licensee and a member of the regular nursing staff on duty and present at all times.

Review of the Registered Staff schedule for a certain period revealed there was no Registered Nurse (RN) coverage for the following:

- a) All night shifts during the above noted period.
- b) Day shift coverage for two dates.
- c) Evening Shift coverage for one date.

An interview with the Administrator confirmed that there were no Registered Nurses on duty and in the building on any night shift and every other weekend days and every other weekend evenings. There have been continued recruitment efforts with little success to hire Registered Nurses (RN's) due to their rural location and type of shifts offered (nights and weekends).

The Administrator verified that the home did not have at least one Registered Nurse who was a member of the regular nursing staff on duty and present at all times. [s. 8. (3)]

1. The licensee has failed to ensure the home, furnishings and equipment were maintained in safe condition and in a good state of repair.

Observations during the initial tour and throughout the Resident Quality Inspection (RQI), revealed the following identified deficiencies:

- a) Damaged/scraped wooden doors and paint chipped doors, door frames and radiators in 9 of 13 (69%) of Resident rooms, as well as in communal areas and common washrooms.
- b) Wooden hallway handrails on the main floor were damaged and worn with rough edges in some areas, posing a potential risk to fragile skin.
- c) A nail in the corner of the hand rail on the second floor, near the door to the attic.
- d) Black marks, scrapes and discoloration of the “lexan” covering the baseboards and the linen closet in the main floor hallways.
- e) Privacy curtains for two of the three Residents in an identified room.
- f) Damaged wallpaper in two Resident rooms.
- g) Flooring in the front hallway was cracked in several places and also at the top of the ramp on the second floor.

A tour was conducted with the Administrator who confirmed the identified deficiencies and indicated that the home does not have a preventive maintenance painting schedule in place. The Administrator acknowledged the expectation of the home was to ensure that furnishings and equipment be maintained in a safe condition and in a good state of repair. [s. 15. (2) (c)]

- s. 15. (1) Every licensee of a long-term care home shall ensure that where bed rails are used,**  
**(a) the resident is assessed and his or her bed system is evaluated in accordance with evidence-based practices and, if there are none, in accordance with prevailing practices, to minimize risk to the resident; O. Reg. 79/10, s. 15 (1).**  
**(b) steps are taken to prevent resident entrapment, taking into consideration all potential zones of entrapment; and O. Reg. 79/10, s. 15 (1).**  
**(c) other safety issues related to the use of bed rails are addressed, including height and latch reliability. O. Reg. 79/10, s. 15 (1).**

**Findings/Faits saillants :**

1. The licensee has failed to ensure that where bed rails were used, steps were taken to prevent resident entrapment, taking into consideration all potential zones of entrapment.

Three identified Resident beds were noted to have potential bed entrapment risks.

A bed assessment dated 2014 noted the above identified beds had passed in all four zones of entrapment. A tour was conducted with the Administrator who confirmed the potential bed entrapment risks. The Administrator was unsure why the beds had passed when they had obvious bed entrapment concerns.

The Administrator verified that where bed rails were used steps were not taken to prevent Resident entrapment, taking into consideration all potential zones of entrapment.

During the initial tour, it was noted that an exterior window located in an identified area opened 61 centimetres and was accessible to Residents.
