s. 272. Every licensee of a long-term care home shall ensure that all applicable directives, orders, guidance, advice or recommendations issued by the Chief Medical Officer of Health or a medical officer of health appointed under the Health Protection and Promotion Act are followed in the home.

The licensee failed to ensure that all applicable directives, orders, guidance, advice or recommendations issued by the Chief Medical Officer of Health or a medical officer of health appointed under the Health Protection and Promotion Act are followed by the staff.

Rationale and Summary

The Recommendations for Outbreak Prevention and Control in Institutions and Congregate Living Settings, revised April 2024, stated all health care workers or essential caregivers providing direct care to or interacting with a suspect or confirmed case of COVID-19 should wear eye protection (goggles, face shield, or safety glasses with side protection), gown, gloves, a well-fitted medical mask (surgical/procedure) or a fit-tested, seal-checked N95 respirator (or approved equivalent).

The Long-Term Care Home (LTCH) Inspector observed a visitor inside the resident room interacting with the resident who was on droplet contact precautions as a suspected case of COVID-19. The visitor was not wearing the appropriate PPE while interacting with the resident inside their room.

The IPAC Lead stated the visitor was expected to wear to full PPE before entering the room due to risk of the transmission of infection.
