---

**WN #1: The Licensee has failed to comply with O.Reg 79/10, s. 36. Every licensee of a long-term care home shall ensure that staff use safe transferring and positioning devices or techniques when assisting residents. O. Reg. 79/10, s. 36.**

**Findings/Faits saillants :**

1. The licensee failed to ensure that staff used safe transferring techniques.

On a specified date, the VP of Nursing and the Assistant VP of Nursing received a written complaint from resident #002's SDM. The complaint was in relation to an injury that the resident sustained.

A review of the resident's health care record indicated that on a specified date, during the resident's shower, an injury to a specified body part was noted.

As part of the home's investigation, several staff members were interviewed including PSW #112, who along with an agency PSW, had put resident #002 to bed on the evening shift, the day before the injury was discovered. According to PSW #112, resident #002 was transferred to bed by the two PSWs manually. PSW #112 confirmed the method of transfer on May 2, 2019 in an interview with the inspector.

According to resident #002's plan of care, the resident was to be transferred by two staff with a full mechanical lift.

A safe transferring technique was not used when assisting resident #002 on a specified date when the resident was transferred without the mechanical lift. [s. 36.]

***Additional Required Actions:***

***VPC - pursuant to the Long-Term Care Homes Act, 2007, S.O. 2007, c.8, s.152(2) the licensee is hereby requested to prepare a written plan of correction for achieving compliance to ensure that staff use safe transferring techniques when assisting residents, to be implemented voluntarily.***
