(A requirement under the LTCHA includes the requirements contained in the items listed in the definition of "requirement under this Act" in subsection 2(1) of the LTCHA.)	Le non-respect des exigences de la Loi de 2007 sur les foyers de soins de longue durée (LFSLD) a été constaté. (Une exigence de la loi comprend les exigences qui font partie des éléments énumérés dans la définition de « exigence prévue par la présente loi », au paragraphe 2(1) de la LFSLD.)
The following constitutes written notification of non-compliance under paragraph 1 of section 152 of the LTCHA.	Ce qui suit constitue un avis écrit de non-respect aux termes du paragraphe 1 de l'article 152 de la LFSLD.

WN #1: The Licensee has failed to comply with O.Reg 79/10, s. 15. Bed rails

Specifically failed to comply with the following subsections:

- s. 15. (1) Every licensee of a long-term care home shall ensure that where bed rails are used,
(a) the resident is assessed and his or her bed system is evaluated in accordance with evidence-based practices and, if there are none, in accordance with prevailing practices, to minimize risk to the resident;
(b) steps are taken to prevent resident entrapment, taking into consideration all potential zones of entrapment; and
(c) other safety issues related to the use of bed rails are addressed, including height and latch reliability. O. Reg. 79/10, s. 15 (1).

Findings/Faits saillants :

1. O. Reg 79/10, s. 15(1)(a) identifies that where bed rails are used, a resident's bed system is to be evaluated in accordance with evidence based practices or with prevailing practices, to minimize risk to the resident.
2. Evidence based prevailing practices are identified in Health Canada's Guidance Document titled "Adult Hospital Beds: Patient Entrapment Hazards, Side Rail Latching Reliability, and Other Hazards".
3. During the course of an inspection in the home on May 24, 2012, potential zones of entrapment were identified on 6 of 6 residents' bed systems that were measured on the 2nd floor of the home: bed rails with an open space of greater than 120 mm (4 3/4 inches) within the inner perimeter of the rail are in use in rooms as identified. Protective covers were not in use on the bed rails that were measured. In a discussion related to the residents' beds, the home's previous Administrator identified that residents' bed systems had been evaluated and that entrapment zones had been identified. It was further identified that action had not been taken and none was planned to mitigate the potential entrapment risks that were identified as a result of the evaluation that had been done. A Compliance Order was issued with a date for compliance set as July 16, 2012.
4. On September 27 and 28, 2012 a follow up inspection was conducted. Compliance order (CO) #004 had not been complied with. Potential zones of entrapment as identified during the inspection conducted on May 24, 2012 and as noted in CO #004 remained present.
5. The current Administrator of the home and the Director of Care provided documentation that all residents' bed systems were evaluated for entrapment hazards during August 2012. Documentation was also provided identifying that entrapment prevention barriers were ordered on September 26, 2012 for all bed systems identified to have zone 1 to 4 entrapment zone risks. The barriers were not in place at the time of the inspection on September 27 and 28, 2012.
6. Steps were not taken to minimize risk to the resident and prevent possible resident entrapment, taking into consideration all potential zones of entrapment, by the compliance order date of July 16, 2012. The order has been issued again with a revised date for compliance. [s. 15.(1)(b)]

WN #2: The Licensee has failed to comply with O.Reg 79/10, s. 13. Every licensee of a long-term care home shall ensure that every resident bedroom occupied by more than one resident has sufficient privacy curtains to provide privacy. O. Reg. 79/10, s. 13.

Findings/Faits saillants :

1. Sufficient privacy curtains to provide privacy are not provided in a number of shared resident bedrooms:
 - in a number of bedrooms, access into an ensuite washroom has not been separated from a nearby resident's bed space (example: rooms identified etc.);
 - in a number of bedrooms, privacy curtains are not provided on all sides of stationary and non stationary overhead lifts so that resident privacy can be maintained at all times(example: rooms identified, etc.);
 - room identified is occupied by 4 residents; privacy curtains are insufficient to enclose one of the four beds.

Additional Required Actions:

VPC - pursuant to the Long-Term Care Homes Act, 2007, S.O. 2007, c.8, s.152(2) the licensee is hereby requested to prepare a written plan of correction for achieving compliance to ensure that every shared resident room is equipped with sufficient privacy curtains around each bed to provide privacy to every resident of the room, to be implemented voluntarily.
