WN #1: The Licensee has failed to comply with O.Reg 79/10, s. 26. Plan of care
Specifically failed to comply with the following:

s. 26. (3) A plan of care must be based on, at a minimum, interdisciplinary assessment of the following with respect to the resident:

19. Safety risks. O. Reg. 79/10, s. 26 (3).

Findings/Faits saillants :

1. The licensee has failed to ensure that a resident's plan of care was based on, at a minimum, of an interdisciplinary assessment including safety risks.

A resident had a skin assessment completed for an injury caused by the resident's personal equipment. There was no documented evidence in the resident's plan of care or a safety risks assessment completed to deem them safe to use the equipment. The resident said they forgot the equipment was turned on which resulted in an injury.

A RA stated that, usually, the resident's equipment was kept locked at the nursing station, but was not at the time of the incident.

A RPN had been aware that the resident was injured by the same equipment prior to being admitted to the home. According to staff the resident was cognitively impaired.

Safety risk assessments had not been completed for residents in the home for the use of personal equipment, to ensure their safety. The home had no policy or procedures to assess residents for safety risks.

The home's failure to assess residents for safety risks posed actual harm to the resident and a risk of harm to all residents in the home.

Sources: The home's Point Click Care (PCC) Wound Line List, resident's clinical records, home's Point Click Care (PCC) Wound Line List, interviews with the resident, DOC and other staff. [s. 26. (3) 19.]
