1. The licensee failed to ensure that the care set out in the 24-hour admission care plan is based in the resident's assessed needs and preferences and on the assessments, reassessments and information provided by the placement co-ordinator. A resident was admitted to the home for respite care for twelve days. According to the resident's spouse, the Lorazepam was given to the resident every morning and every evening prior to giving the resident care. The information that was provided to the home by the CCAC for medications stated that he/she receives Lorazepam 1 mg twice a day 1 hour prior to morning and evening care.

The licensee, when reconciling the medication orders from CCAC, transcribed the Lorazepam as a PRN order rather than a routine order which the resident had been receiving prior to admission to the home. The resident did not receive the Lorazepam twice a day as previously prescribed by his physician. [s. 24. (4)]
