1. The licensee did not ensure that one resident exhibiting altered skin integrity, including skin breakdown, pressure ulcers, skin tears or wounds, received a skin assessment by a member of the registered nursing staff, using a clinically appropriate assessment instrument that is specifically designed for skin and wound assessment. Review of one resident health record confirmed treatment was initiated for a wound in the absence of a skin assessment. Two staff confirmed treatment was initiated in the absence of a skin assessment completed by registered staff using a clinically appropriate assessment instrument designed for skin and wound assessment. On the date of inspection, wound treatment continued to be provided. [s. 50. (2)]
