- 22. Every resident has the right to share a room with another resident according to their mutual wishes, if appropriate accommodation is available.
- 23. Every resident has the right to pursue social, cultural, religious, spiritual and other interests, to develop his or her potential and to be given reasonable assistance by the licensee to pursue these interests and to develop his or her potential.
- 24. Every resident has the right to be informed in writing of any law, rule or policy affecting services provided to the resident and of the procedures for initiating complaints.
- 25. Every resident has the right to manage his or her own financial affairs unless the resident lacks the legal capacity to do so.
- 26. Every resident has the right to be given access to protected outdoor areas in order to enjoy outdoor activity unless the physical setting makes this impossible.
- 27. Every resident has the right to have any friend, family member, or other person of importance to the resident attend any meeting with the licensee or the staff of the home. 2007, c. 8, s. 3 (1).

Findings/Faits saillants:

1. (1) The identified resident was not cared for in a manner consistent with their needs.

The resident's family member expressed concerns that the resident was not taken to the toilet when they required toileting during meal time.

Interviews with four personal support worker staff members on the resident's unit confirmed that they are not supposed to leave the dining room during the meal service. They confirmed that if a resident requests toileting and a sit/stand lift and two staff assistance is required that they would ask the resident to wait until after the meal service. They indicated that on occasion they would toilet a resident but it was not the usual practice to toilet residents during meal service.

WN #2: The Licensee has failed to comply with O.Reg 79/10, s. 51. Continence care and bowel management Specifically failed to comply with the following subsections:

- s. 51. (2) Every licensee of a long-term care home shall ensure that,
- (a) each resident who is incontinent receives an assessment that includes identification of causal factors, patterns, type of incontinence and potential to restore function with specific interventions, and that where the condition or circumstances of the resident require, an assessment is conducted using a clinically appropriate assessment instrument that is specifically designed for assessment of incontinence;
- (b) each resident who is incontinent has an individualized plan, as part of his or her plan of care, to promote and manage bowel and bladder continence based on the assessment and that the plan is implemented;
- (c) each resident who is unable to toilet independently some or all of the time receives assistance from staff to manage and maintain continence;
- (d) each resident who is incontinent and has been assessed as being potentially continent or continent some of the time receives the assistance and support from staff to become continent or continent some of the time;
- (e) continence care products are not used as an alternative to providing assistance to a person to toilet:
- (f) there are a range of continence care products available and accessible to residents and staff at all times, and in sufficient quantities for all required changes;
- (g) residents who require continence care products have sufficient changes to remain clean, dry and comfortable; and
- (h) residents are provided with a range of continence care products that.
- (i) are based on their individual assessed needs,
- (ii) properly fit the residents,
- (iii) promote resident comfort, ease of use, dignity and good skin integrity,
- (iv) promote continued independence wherever possible, and
- (v) are appropriate for the time of day, and for the individual resident's type of incontinence. O. Reg. 79/10, s. 51 (2).

Findings/Faits sailiants:

Inspection Report under the Long-Term Care Homes Act, 2007 Ministère de la Santé et des Soins de longue durée

Rapport d'inspection prévue le Loi de 2007 les foyers de soins de longue

- 1. The plan of care for the identified resident was not individualized to manage their bowel and bladder continence needs.
- a) The plan of care for the identified resident directs staff to provide the "non ambulatory toileting routine" every four hours and as required (PRN) using two staff and a sit/stand lift. The plan of care for the identified resident does not identify any specific times for toileting of the resident. Staff interviewed confirmed that the resident may benefit from toileting prior to the meal service. The plan of care does not identify any interventions to address this issue. Toileting of the resident prior to the meal service was not identified in the resident's plan of care.

The resident uses an incontinent product on all three shifts but there is no individualized care plan to determine the frequency of brief changes and incontinent care for this resident.

b) The plan of care for the identified resident related to toileting/continence was not implemented by staff on the unit. The plan of care indicated that the resident was to be toileted every four hours, however interviews with personal support worker staff members confirmed that the resident had not been toileted every four hours as directed. An observation of the identified resident on the day of the inspection revealed that the resident was not toileted every four hours as directed on their plan of care.
