soins de longue durée**

The purpose of this inspection was to conduct a Critical Incident System inspection.

This inspection was conducted on the following date(s): March 10, 11, 14, 2016.

This inspection was conducted related to care planning and falls prevention which was reported in a critical incident report submitted to the Director. During the course of the inspection the following were reviewed: resident #001's health record and relevant policies and procedures.

During the course of the inspection, the inspector(s) spoke with the Executive Director, Director of Care, registered staff members and personal support workers.

**The following Inspection Protocols were used during this inspection:
Falls Prevention**

During the course of this inspection, Non-Compliances were issued.

WN #1: The Licensee has failed to comply with O.Reg 79/10, s. 36. Every licensee of a long-term care home shall ensure that staff use safe transferring and positioning devices or techniques when assisting residents. O. Reg. 79/10, s. 36.

Findings/Faits saillants :

1. The licensee has failed to ensure that staff use safe transferring and positioning devices or techniques when assisting residents.

The written plan of care for resident #001 documents that the resident is at risk for falls related to cognitive deficit and impaired mobility. The resident requires two people to transfer with the assistance of a mechanical device.

On an identified date, the licensee submitted a critical incident to the Director reporting that resident #001 sustained an injury to a disclosed location on his/her body of unknown cause. The home conducted an internal investigation to determine how the resident sustained the injury.

Interviews held with staff members #102 and #105 confirmed that they were aware of the resident's transfer requirements however, on or around a specified date, they executed a transfer without the use of a mechanical device.

Further interviews with staff members #102, #105 and the Director of Care confirmed that safe transferring techniques were not used on the specified date, when they transferred resident #001. The homes investigation was unable to confirm how the resident sustained the injury. Both staff members were disciplined. [s. 36.]

Additional Required Actions:

VPC - pursuant to the Long-Term Care Homes Act, 2007, S.O. 2007, c.8, s.152(2) the licensee is hereby requested to prepare a written plan of correction for achieving compliance to ensure that staff use safe transferring and positioning devices or techniques when assisting residents, to be implemented voluntarily.
