Findings/Faits saillants :

1. The licensee failed to ensure that where bed rails are used the resident is assessed in accordance with evidence-based practices and, if there are none, in accordance with prevailing practices, to minimize risk to the resident.

On September 15, 2014 an identified resident was observed lying in bed with bilateral raised quarter side rails.

Review of the resident's clinical record revealed the absence of a documented Assessment for Personal Assistive Safety Device Intervention for the use of bed rails. Review of the resident's plan of care revealed the absence of documentation related to the use of bed rails.

On September 15, 2014 another identified resident was observed lying in bed with bilateral raised quarter side rails.

Review of the resident's clinical record revealed the absence of a documented Assessment for Personal Assistive Safety Device Intervention.

Review of the home's Compliance Plan submitted June 27, 2014 revealed:

1. Consents for residents requiring PASDs will be completed and appropriate PASD applied as per results of assessments by July 25 2014.
2. A PASD/Restraint Summary Checklist will be completed by July 15 2014 and any corrective action required as per the results of the audit will be completed by July 25 2014. Ongoing restraint/PASD audits will be completed monthly by the DOC/designate. Care plans will be updated accordingly.

Interview with the Director of Nursing regarding the residents [REDACTED] who use bed rails revealed 16/24 (66%) of residents use bed rails. Review of the list of residents [REDACTED] [REDACTED] who had an Assessment for Personal Assistive Safety Device Intervention revealed 4 residents had assessments for the use of bed rails.

The home's Least Restraint, Last Resort policy CS-5.1, revised June 2014 states there must be an Assessment for Personal Assistive Safety Device (PASD) Intervention, consent and an order for the use of a PASD; which includes bed rails. Interview with the Director of Nursing revealed that as per instructions from Omni Healthcare; resident's that use a high/low bed or use quarter side rails did not need a bed rail assessment for a PASD. The DON was unaware that the legislation requires
