Inspection Summary/Résumé de l'inspection

The purpose of this inspection was to conduct a Critical Incident System inspection.

This inspection was conducted on the following date(s): August 27, 28, September 10, 2014.

During the course of the inspection, the inspector(s) spoke with the Administrator, Director of Resident Care (DRC), social worker, registered staff, personal support workers, a member of the resident's family.

During the course of the inspection, the inspector(s) reviewed resident record, home records and policies, performed visual inspection of the doors leading to the patios on 2nd and 3rd floor.

The following Inspection Protocols were used during this inspection:
Responsive Behaviours
Safe and Secure Home

Findings of Non-Compliance were found during this inspection.

NON-COMPLIANCE / NON - RESPECT DES EXIGENCES	
Legend WN – Written Notification VPC – Voluntary Plan of Correction DR – Director Referral CO – Compliance Order WAO – Work and Activity Order	Legendé WN – Avis écrit VPC – Plan de redressement volontaire DR – Aiguillage au directeur CO – Ordre de conformité WAO – Ordres : travaux et activités
Non-compliance with requirements under the Long-Term Care Homes Act, 2007 (LTCHA) was found. (A requirement under the LTCHA includes the requirements contained in the items listed in the definition of "requirement under this Act" in subsection 2(1) of the LTCHA.) The following constitutes written notification of non-compliance under paragraph 1 of section 152 of the LTCHA.	Le non-respect des exigences de la Loi de 2007 sur les foyers de soins de longue durée (LFSLD) a été constaté. (Une exigence de la loi comprend les exigences qui font partie des éléments énumérés dans la définition de « exigence prévue par la présente loi », au paragraphe 2(1) de la LFSLD. Ce qui suit constitue un avis écrit de non-respect aux termes du paragraphe 1 de l'article 152 de la LFSLD.

WN #1: The Licensee has failed to comply with O.Reg 79/10, s. 9. Doors in a home

Specifically failed to comply with the following:

1. All doors leading to stairways and the outside of the home other than doors leading to secure outside areas that preclude exit by a resident, including balconies and terraces, or doors that residents do not have access to must be,
   i. kept closed and locked,
   ii.equipped with a door access control system that is kept on at all times, and
   iii.equipped with an audible door alarm that allows calls to be cancelled only at the point of activation and,
      A. is connected to the resident-staff communication and response system, or
      B. is connected to an audio visual enunciator that is connected to the nurses' station nearest to the door and has a manual reset switch at each door.
O. Reg. 79/10, s. 9; O. Reg. 363/11, s. 1 (1, 2).

1.1. All doors leading to secure outside areas that preclude exit by a resident, including balconies and terraces, must be equipped with locks to restrict unsupervised access to those areas by residents.
O. Reg. 79/10, s. 9; O. Reg. 363/11, s. 1 (1, 2).

s. 9. (2) The licensee shall ensure there is a written policy that deals with when doors leading to secure outside areas must be unlocked or locked to permit or restrict unsupervised access to those areas by residents. O. Reg. 363/11, s. 1 (3).

Findings/Faits saillants :

1. The licensee failed to ensure that doors leading to the 2nd and 3rd floor balconies are equipped with locks to restrict unsupervised access to those areas by residents. This was evidenced by observation that the 2nd and 3rd floor balconies located off of the dining room did not have locks present on the doors that restricted unsupervised access to those areas by residents. Each balcony had 2 doors present to gain access to the balconies.

- The patio door locking mechanism was observed to be installed backwards on both units. The key locking mechanism was noted to be on the exterior of the door and the toggle mechanism on the interior preventing restricted access to the balconies when necessary.
- The sliding patio doors did not have a lock present on them that restricted unsupervised access to the balconies. It was also noted that a high threshold was present creating a trip hazard if utilized.

On an identified date, resident #1 accessed the unsupervised balcony and died. [s. 9. (1) 1.1.]

2. The licensee failed to ensure that a written policy dealing with when doors leading to secure outside areas are to be unlocked or locked to permit or restrict unsupervised access to those areas by residents, was present. This was evidenced by review of the home's current door security policy and interview with the Administrator and Director of Care. The home currently does not have a policy in place regarding doors leading to balconies in the home, outlining when the doors must be unlocked or locked to permit or restrict unsupervised access to those areas by residents. [s. 9. (2)]

Additional Required Actions:

CO # - 001 will be served on the licensee. Refer to the "Order(s) of the Inspector".

WN #2: The Licensee has failed to comply with O.Reg 79/10, s. 221. Additional training — direct care staff

Specifically failed to comply with the following:

s. 221. (2) The licensee shall ensure that all staff who provide direct care to residents receive the training provided for in subsection 76 (7) of the Act based on the following:
1. Subject to paragraph 2, the staff must receive annual training in all the areas required under subsection 76 (7) of the Act. O. Reg. 79/10, s. 221 (2).
2. If the licensee assesses the individual training needs of a staff member, the staff member is only required to receive training based on his or her assessed needs. O. Reg. 79/10, s. 221 (2).

s. 221. (2) The licensee shall ensure that all staff who provide direct care to residents receive the training provided for in subsection 76 (7) of the Act based on the following:
1. Subject to paragraph 2, the staff must receive annual training in all the areas required under subsection 76 (7) of the Act. O. Reg. 79/10, s. 221 (2).

Findings/Faits saillants :

1. The licensee has failed to ensure that all direct care staff receive the required training related to mental health issues as per section 76 (7) 2 of the Long Term Care Homes Act (LTCHA), annually or as per their individually assessed training needs.

Staff interviews and review of the home's training records confirm that no direct care staff members have received training related to mental health issues, in 2013 or in 2014 to date. The home's Director of Resident Care confirmed that the direct care staff members have not received training related to mental health issues, in 2013 or 2014 to date, or as per their individually assessed training needs.

This non-compliance was previously identified in inspection # 2012_102116_0041, conducted on December 17, 2012, with a WN and a VPC issued. [s. 221. (2),s. 221. (2) 1.]

Additional Required Actions:

CO # - 002 will be served on the licensee. Refer to the "Order(s) of the Inspector".

WN #3: The Licensee has failed to comply with LTCHA, 2007 S.O. 2007, c.8, s. 6. Plan of care

Specifically failed to comply with the following:

s. 6. (4) The licensee shall ensure that the staff and others involved in the different aspects of care of the resident collaborate with each other,
(a) in the assessment of the resident so that their assessments are integrated and are consistent with and complement each other; and 2007, c. 8, s. 6 (4).
(b) in the development and implementation of the plan of care so that the different aspects of care are integrated and are consistent with and complement each other. 2007, c. 8, s. 6 (4).

s. 6. (10) The licensee shall ensure that the resident is reassessed and the plan of care reviewed and revised at least every six months and at any other time when,
(a) a goal in the plan is met; 2007, c. 8, s. 6 (10).
(b) the resident's care needs change or care set out in the plan is no longer necessary; or 2007, c. 8, s. 6 (10).
(c) care set out in the plan has not been effective. 2007, c. 8, s. 6 (10).

Findings/Faits saillants :

1. The licensee has failed to ensure that staff and others involved in the different aspects of care collaborate with each other in the assessment of the resident so that their assessments are integrated, consistent with, and complement each other.

Staff interviews and record review confirm that the home's staff did not collaborate with resident #1's personal physician regarding assessment of the resident. Staff interviews confirm that front line staff did not assess the resident as suffering from an identified condition during the resident's stay in the long term care home (LTCH). Record review, staff interviews and family interviews confirm that on an identified date, the resident's physician prescribed an identified medication for the resident. Staff interviews confirm that although they administered the medication, front line staff did not discuss the resident's condition with his physician, and were not aware of the physician's reasons for prescribing the medication. [s. 6. (4) (a)]

2. The licensee has failed to ensure that the resident was reassessed and the plan of care reviewed and revised at any time when the resident's care needs change.

Review of resident records confirms that the admission minimum data set (MDS) assessment for resident #1, was completed shortly after admission to the LTCH. Record review and interviews with front line staff confirm that subsequent to this assessment, the resident's condition changed.
The resident was not reassessed, and his/her plan of care was not revised after this change in condition.
Furthermore, after the resident's physician prescribed an identified medication, the resident was not reassessed or his/her plan of care reviewed and revised to include any interventions for this change in condition, other than the intervention of administering the newly prescribed medication. [s. 6. (10) (b)]

Additional Required Actions:

VPC - pursuant to the Long-Term Care Homes Act, 2007, S.O. 2007, c.8, s.152(2) the licensee is hereby requested to prepare a written plan of correction for achieving compliance to ensure that
-staff and others involved in the different aspects of care collaborate with each other in the assessment of the resident so that their assessments are integrated, consistent with, and complement each other
-residents are reassessed and the plan of care reviewed and revised at any time when the resident's care needs change, to be implemented voluntarily.

WN #4: The Licensee has failed to comply with O.Reg 79/10, s. 134. Residents' drug regimes
Every licensee of a long-term care home shall ensure that,
(a) when a resident is taking any drug or combination of drugs, including psychotropic drugs, there is monitoring and documentation of the resident's response and the effectiveness of the drugs appropriate to the risk level of the drugs;
(b) appropriate actions are taken in response to any medication incident involving a resident and any adverse drug reaction to a drug or combination of drugs, including psychotropic drugs; and
(c) there is, at least quarterly, a documented reassessment of each resident's drug regime. O. Reg. 79/10, s. 134.

Findings/Faits saillants :

1. The licensee has failed to ensure that when a resident is taking any drug or combination of drugs, including psychotropic drugs, there is monitoring and documentation of the resident's response and the effectiveness of the drugs appropriate to the risk level of the drugs.

Staff interviews and record review confirm that after resident #1 began receiving an identified newly prescribed medication, the resident's response to the drug was not monitored, nor documented.

The home's DRC confirmed during interview that resident #1's response to the newly prescribed medication was not monitored or tracked, formally or informally. [s. 134. (a)]

Additional Required Actions:

VPC - pursuant to the Long-Term Care Homes Act, 2007, S.O. 2007, c.8, s.152(2) the licensee is hereby requested to prepare a written plan of correction for achieving compliance to ensure that when a resident is taking any drug or combination of drugs, including psychotropic drugs, there is monitoring and documentation of the resident's response and the effectiveness of the drugs appropriate to the risk level of the drugs, to be implemented voluntarily.
