Findings/Faits saillants :

1. The licensee has failed to ensure that the plan of care for resident #001 is based on an assessment of the resident and the needs of that resident.

Record review of Minimum Data Set assessment conducted in November 2012 and February 2013 indicated that resident #001 requires two plus persons physical assist for transferring. Additionally, physiotherapist assessment notes entered in November 2012 and February 2013 also state that resident #001 requires two persons assist for transferring.

Record review and staff interviews indicate that until March 14, 2013 that resident #001's care plan states that the resident requires one person to assist with transferring. The care plan was revised in March 2013 to state that resident #001 requires two staff assistance and the use of mechanical hooyer lift for transfer. [s. 6. (2)]

2. The licensee has failed to ensure that the care set out in the plan of care is provided to the resident as specified in the plan.

Record review confirms that resident #001's plan of care was revised in March 2013 to reflect that the resident requires two persons assist with transferring using mechanical hooyer lift. Staff interviews, resident interview, and record review confirm that on an identified day the resident was transferred from wheelchair to bed with the assistance of only one staff member and no mechanical lift.

On the same day resident #001 complained of shoulder pain and indicated that it had started when he/she was transferred from wheelchair to bed by one staff member. The resident stated he/she fell backward into the bed foot board during the transfer. The resident developed bruising and swelling on the shoulder the following day. Five days later resident #001 was diagnosed with an undisplaced fracture of the affected area. [s. 6. (7)]
