1. The licensee did not ensure that one resident received a skin assessment by a member of the registered nursing staff. Review of the Personal Service Workers weekly skin observation reports completed during the bathing process, reveal one resident was noted to have a new skin condition on four occasions. Skin assessments by registered staff using a clinically appropriate assessment instrument designed for skin and wound assessments, were not completed in response to Personal Service Workers observation reports. Two staff confirmed the assessments were not completed. [s. 50. (2) (b) (i)]
