WN #1: The Licensee has failed to comply with O.Reg 79/10, s. 51. Continence care and bowel management

Specifically failed to comply with the following:

s. 51. (2) Every licensee of a long-term care home shall ensure that, (a) each resident who is incontinent receives an assessment that includes identification of causal factors, patterns, type of incontinence and potential to restore function with specific interventions, and that where the condition or circumstances of the resident require, an assessment is conducted using a clinically appropriate assessment instrument that is specifically designed for assessment of incontinence; O. Reg. 79/10, s. 51 (2).

Findings/Faits saillants :

1. The licensee has failed to ensure that a resident who is incontinent received an assessment that includes identification of causal factors, patterns, type of incontinence and potential to restore function with specific interventions, and was conducted using a clinically appropriate assessment instrument that is specifically designed for assessment of incontinence where the condition or circumstances of the resident require.

A review of the annual assessment showed the resident had incontinence.

The Bowel and Bladder Management Program Procedures:

"Complete the Caressant Care Continence Assessment on all the residents who score a two (2) or higher on section H1A or H1B of any MDS assessment or at any time when upon resident change in status".

A review of the documentation showed that the resident who was incontinent had not received an assessment that included identification of causal factors, patterns, type of incontinence and potential to restore function with specific interventions, and was conducted using a clinically appropriate assessment instrument that is specifically designed for assessment of incontinence where the condition or circumstances of the resident require.

The RAI Coordinator # 105 confirmed that the resident should have had an assessment completed on admission and each time the MDS assessment was greater than two for incontinence. [s. 51. (2) (a)]
