INSPECTION RESULTS

WRITTEN NOTIFICATION: Air temperature

NC #001 Written Notification pursuant to FLTCA, 2021, s. 154 (1) 1.

Non-compliance with: O. Reg. 246/22, s. 24 (3)

The licensee has failed to document the temperature required to be measured under subsection (2) at least once every morning, once every afternoon between twelve and five p.m., and once every evening or night.

Per O. Reg 246/22 subsection (2), the licensee is required to measure and document the air temperature in at least two resident bedrooms in different parts of the home, and one resident common area on every floor of the home.

Rationale and Summary

Based on review of the home's air temperature monitoring records from August 1 to 13, 2023, temperatures were not documented in the resident bedrooms six times in the morning, three times in the afternoon, and three times at night. In the same time frame, temperatures were not documented in resident common areas three times during the morning, one time in the afternoon, and one time at night.

There was a risk to residents that the heat-related illness plan would not be implemented as required when the temperatures were not measured.
