1. The licensee has failed to ensure that the resident is reassessed and the plan of care reviewed and revised at least every six months and at any other time when, the resident's care needs change or care set out in the plan is no longer necessary.

A) One identified resident was given a diagnosis after specific tests were completed.

B) Documentation in the resident's clinical record included a nursing assessment of the resident on specific dates. There was no further nursing assessments of the resident's condition documented in the clinical record during the Inspectors period of review.

C) On diagnosis, the resident was prescribed treatment by the physician for a specific period of time.

D) The minimum data set (MDS) quarterly review completed for the resident during the time of the above treatment, did not include the diagnosis the resident was receiving treatment for.

E) The resident's plan of care was reviewed during the period the resident was receiving treatment and was not revised to include the diagnosis and treatment ordered by the physician.

F) The DOC #105 said that the diagnosis would require nursing staff to document by exception and nursing staff should have continued to assess the resident's condition until the symptoms were resolved.

G) The Administrator #100, DOC #105 and RN #138 said that the resident's MDS review and plan of care should have included the diagnosis and treatment ordered by the physician. [s. 6. (10) (b)]
