1. The home failed to ensure that no drug is used or administered to a resident in the home unless the drug has been prescribed for the resident. Review of the health record for one resident confirmed a new medication was ordered before the physician three month medication and treatment review was completed. The medication was not included in the medication and treatment review. At the time of inspection, the medication order had not been reviewed by the physician. The resident continued to receive the medication after the medication and treatment review was completed. Interview with staff confirmed the above findings. [s. 131.]
