Non-compliance with requirements under the Long-Term Care Homes Act, 2007 (LTCHA) was found. (a requirement under the LTCHA includes the requirements contained in the items listed in the definition of "requirement under this Act" in subsection 2(1) of the LTCHA).

The following constitutes written notification of non-compliance under paragraph 1 of section 152 of the LTCHA.

Le non-respect des exigences de la Loi de 2007 sur les foyers de soins de longue durée (LFSLD) a été constaté. (une exigence de la loi comprend les exigences qui font partie des éléments énumérés dans la définition de « exigence prévue par la présente loi », au paragraphe 2(1) de la LFSLD.

Ce qui suit constitue un avis écrit de non-respect aux termes du paragraphe 1 de l'article 152 de la LFSLD.

**WN #1: The Licensee has failed to comply with O.Reg 79/10, s. 229. Infection prevention and control program**

**Specifically failed to comply with the following:**

**s. 229. (4) The licensee shall ensure that all staff participate in the implementation of the program. O. Reg. 79/10, s. 229 (4).**

**Findings/Faits saillants :**

**Inspection Report under the Long-Term Care Homes Act, 2007****Rapport d'inspection en vertu de la Loi de 2007 sur les foyers de soins de longue durée**

1. The licensee has failed to ensure that staff participated in the implementation of the Infection Prevention and Control (IPAC) program.

The home submitted Critical Incident System (CIS) report, related to an outbreak in the home. According to the administrator, public health declared the entire home in an outbreak and staff were directed to follow contact and droplet precautions home wide. A number of residents and staff had been tested positive for the outbreak.

Observations were conducted by the inspector and noted the following:

- A PSW was observed exiting a resident's room after providing care to them and applied hand sanitizer on their gloves. The PSW indicated they were not supposed to be doing this after exiting a resident's room.
- Another PSW was observed to not have doffed off their surgical mask after exiting a resident's room and performing care on the resident.

An interview with the administrator and a Universal Care consultant indicated the following:

- The home reviews the expectations on donning and doffing, which includes signage to remind staff on the proper practices on donning and doffing and also there were regular huddles and communication to staff on these practices. The PSW should not have been doing hand hygiene while their gloves were on.
- The home's proper IPAC practice was to have the staff remove their old surgical mask and apply a new one after they exit a resident's room.

As there was an outbreak at the home and the observations demonstrated that there were inconsistent IPAC practices from the staff of the home there was actual harm to the residents of the home. The risk associated to the staff not adhering to the home's IPAC program would be possible transmission of infectious agents during the ongoing outbreak in the home.

**WN #2: The Licensee has failed to comply with LTCHA, 2007 S.O. 2007, c.8, s. 15.  
Accommodation services**

**Specifically failed to comply with the following:**

- s. 15. (2) Every licensee of a long-term care home shall ensure that,**  
**(a) the home, furnishings and equipment are kept clean and sanitary; 2007, c. 8, s. 15 (2).**  
**(b) each resident's linen and personal clothing is collected, sorted, cleaned and delivered; and 2007, c. 8, s. 15 (2).**  
**(c) the home, furnishings and equipment are maintained in a safe condition and in a good state of repair. 2007, c. 8, s. 15 (2).**

**Findings/Faits saillants :**

1. The licensee failed to ensure that the home was kept clean and sanitary.

An observation in the home indicated the following:

- A full garbage bag with food waste was left in the hallway on a resident unit. An RPN indicated that the garbage will be taken out by them, as there was a miscommunication between them and the housekeeper on taking out the food waste garbage.
- Hair shavings were observed in the hallway, on a resident unit. A PSW stated that the hair shavings were not supposed to be in the hallways of the unit and that this did not follow the home's IPAC practices of the home.

An interview with the administrator and the Universal Care Consultant indicated the following:

- The garbage on the first floor should not have been left in the hallways of the unit, since there was staff available to remove the garbage from the home.
- It was not appropriate to have hair shavings left on the hallways of the unit. It should have been cleaned up by the housekeeper.

The observations demonstrated that there was minimal risk of harm to the residents, as the home was not kept in a clean and sanitary condition.

**Order / Ordre :**

The licensee must be compliant with s. 229 (4) of O. Reg. 79/10.

Specifically, the licensee must:

1. Provide leadership, monitoring, and supervision in all home areas to ensure staff adherence with appropriate Infection Prevention and Control (IPAC) practices.
2. Provide on the spot education and training to staff not adhering with appropriate IPAC measures.

**Grounds / Motifs :**

1. The licensee has failed to ensure that staff participated in the implementation of the Infection Prevention and Control (IPAC) program.

Aux termes de l'article 153 et/ou de l'article 154 de la *Loi de 2007 sur les foyers de soins de longue durée*, L.O. 2007, chap. 8

An interview with the administrator and a Universal Care consultant indicated the following:

- The home reviews the expectations on donning and doffing, which includes signage to remind staff on the proper practices on donning and doffing and also there were regular huddles and communication to staff on these practices. Sources: Interviews with two PSWs, a Universal Care consultant, the administrator and other staff; Record reviews of the line list of residents and observations made in the home.

An order was made by taking the following factors into account:

**Severity:** There was actual risk of harm to the residents because the home was in an outbreak and there was potential for possible transmission of infectious agents due to the staff not participating in the implementation of the IPAC program.

**Scope:** The scope of this non-compliance was widespread because the IPAC related concerns were identified during observations throughout the home, and the non-compliance has the potential to affect a large number of the LTCH's residents.

**Compliance History:** Multiple WNs and VPCs were issued to the home related to different sub-sections of the legislation in the past 36 months (760)
