Inspection Report under the Long-Term Care Homes Act, 2007 Rapport d'inspection en vertu de la Loi de 2007 sur les foyers de soins de longue durée

1. The licensee of a long-term care home failed to ensure that the program was evaluated and updated at least annually in accordance with evidence-based practices and, if there were none, in accordance with prevailing practices.

During the inspection, it was confirmed by the Administrator that the Infection Prevention and Control Program was not evaluated and updated at least annually in 2019.

Sources: the Infection Prevention and Control Program; interview with the Administrator. [s. 229. (2) (d)]

2. The licensee failed to ensure that all staff participated in the implementation of the Infection Prevention and Control program.

During an observation in an identified home area, nine out of nine residents were not encouraged or assisted to perform hand hygiene prior to their meals.

The home's Hand Hygiene Program indicated that alcohol-based hand rub was provided for residents to reduce the risks of environmental contamination. Residents were to be encouraged and/or assisted to perform hand hygiene prior to meal.

Interview with RPN and RN indicated that before meal distribution staff were to sanitize their hands and having two PSWs on the unit was not enough to provide encouragement and/or assistance to the residents with their hand hygiene prior to their meals.

The residents were at risk of potential infection as they were not encouraged or assisted with their hand hygiene prior to their meals.

Sources: the Hand Hygiene Program review and observations; interview with RPN #103 and RN #104. [s. 229. (4)]
