The purpose of this inspection was to conduct a Complaint inspection.

This inspection was conducted on the following date(s): November 19, 20, 2018

During the course of the inspection, the inspector(s) spoke with the Director of Care, a Registered Nurse, a Nurse Practitioner, a Physician, a Personal Support Worker and a resident's Substitute Decision Maker (SDM).

The inspector also reviewed a resident's health care record, including progress notes, advance directives for care forms and hospital discharge notes.

**The following Inspection Protocols were used during this inspection:

WN #1: The Licensee has failed to comply with LTCHA, 2007 S.O. 2007, c.8, s. 6. Plan of care

Specifically failed to comply with the following:

s. 6. (7) The licensee shall ensure that the care set out in the plan of care is provided to the resident as specified in the plan. 2007, c. 8, s. 6 (7).

Findings/Faits saillants :

1. The licensee has failed to ensure that the care set out in a resident's plan of care was provided as specified in the plan.

In the morning, on a specified date, resident #001 was assessed by RN #100 due to a PSW reporting that the resident was not themselves. The assessment by the RN was completed and indicated that the resident was suffering from acute symptoms and the Physician was informed and the POA was called and a

message left. The assessment also indicated the resident was a Level 2 and DNR (Do Not Resuscitate).

Resident #001 continued to be reassessed throughout the morning and early afternoon by registered staff and was also assessed by the Nurse Practitioner (NP). At the time the NP assessed resident #001, no distress was noted, one symptom had stabilized, while another remained.

According to the documentation, multiple attempts were made throughout the morning on this date to reach the resident's Substitute Decision Maker (SDM), with no success.

Mid to late afternoon, resident #001's SDM arrived at the home and according to the progress notes, requested that the resident be sent to the hospital.

The progress notes indicated that when staff called the hospital later that same day, the home was notified that the resident had suffered a specified medical incident and was being admitted.

Resident #001 returned to the home approximately 9 days later, with specified changes to their condition.

Progress notes and interviews with RN #100, NP #102, Physician #103 and the DOC, all indicated that the reason the resident was not transferred to hospital immediately on the specified date, was due to the Advance Directives for Care form signed by resident #001's SDM. This form, signed in 2017, indicated that resident #001 is a "Level 2 Advance Directive – Remain at Home", which is defined as follows:

"Your health care team will provide all medications and non-medicinal care interventions to relieve expected symptoms like pain, fever or breathing difficulties to ensure your comfort. No life prolonging interventions will be undertaken. Your family will be contacted. Your care will focus on symptom relief, comfort measures and allow for a natural death at home, not hospital."

Also on this form, underneath the definitions for level 1 and 2 advance directives, is the following statement:

"Note: In any case when there are acute, unexpected symptoms; an ambulance

will be called and a transfer to hospital will be arranged. Your physician or (on-call) physician will be contacted and your Power of Attorney or Substitute Decision Maker will be notified.”

During an interview with resident #001's SDM, they indicated that due to the above statement on this form, their understanding was that the resident would have been sent to the hospital immediately on the date of the incident, even if the home could not reach them. They further stated that the resident would have wanted to be sent to hospital when suffering from acute, unexpected symptoms.

The Advance Directives for Care form, which is part of resident #001's plan of care, was not followed on the specified date. The resident was suffering from acute, unexpected symptoms and was not sent to hospital until over 6 hours later when the home received consent from the resident's SDM. The Advance Directives for Care form signed by resident #001's SDM indicated that the resident will be sent to hospital. It does not say the home will wait for consent, and therefore, was not followed. [s. 6. (7)]

Additional Required Actions:

CO # - 001 will be served on the licensee. Refer to the “Order(s) of the Inspector”.

The Advance Directives for Care form signed by resident #001's SDM indicated that the resident will be sent to hospital. It does not say the home will wait for consent, and therefore, was not followed.

The decision to issue this non-compliance as a compliance order was based on the following:

The severity of this non-compliance is a level 3 (Actual Risk) as resident #001 was documented as showing specified acute symptoms and was not sent out to hospital for further assessment/treatment until over 6 hours later.

The scope of this non-compliance is determined to be a level 1 (isolated) as only one resident in the home was affected.

The home has a level 3 compliance history (1 or more related non-compliance in last 36 months). (197)
