**WN #1: The Licensee has failed to comply with LTCHA, 2007 S.O. 2007, c.8, s. 6.
Plan of care**

Specifically failed to comply with the following:

s. 6. (7) The licensee shall ensure that the care set out in the plan of care is provided to the resident as specified in the plan. 2007, c. 8, s. 6 (7).

Findings/Faits saillants :

1. The licensee has failed to ensure that the care set out in the plan of care was provided to the resident as specified in the plan.

A review of resident #001's clinical record progress notes revealed that the resident had a fall from an assistive device, on a specific day, while a Personal Support Worker was providing care.

A review of the post fall assessment revealed that the resident sustained an injury, that care was provided, one staff was present during the fall, the physician was contacted and the resident was sent to the hospital.

A review of resident #001's plan of care revealed the following: "Two persons; total dependence".

A Registered Practical Nurse #102 who attended the incident, confirmed that one Personal Support Worker (PSW) was giving the resident care, on that specific date, and had a fall sustaining an injury.

Two Personal Support Workers #103 and #104 confirmed that resident #001 is totally dependent on others, that assistive devices were used for safety and that the resident needed two people to assist with care.

In an interview with the Director of Care #101 and the Administrator #100 confirmed that two persons were needed to help the resident with her care and that on a specific date, only one PSW was assisting the resident. They confirmed that it was the home's expectation that staff would provide the care that is set out in the care plan. [s. 6. (7)]

Specifically failed to comply with the following:**

s. 26. (3) A plan of care must be based on, at a minimum, interdisciplinary assessment of the following with respect to the resident:

19. Safety risks. O. Reg. 79/10, s. 26 (3).

Findings/Faits saillants :

1. The licensee has failed to ensure that the plan of care was based on an interdisciplinary assessment of safety risks.

A review of resident #001's clinical record progress notes revealed that the resident had a fall from an assistive device, on a specific day, while a Personal Support Worker was providing care.

A review of the post fall assessment revealed that the resident sustained an injury, that care was provided, one staff was present during the fall, the physician was contacted and the resident was sent to the hospital.

A review of resident #001 plan of care revealed the following:

- a) The resident is dependent on others for mobility with own assistive devices.
- b) The resident is at risk of falls due to history of falls.
- c) Application of assistive devices for safety.
- d) "Two persons; total dependence".

No documented evidence was found to support that the resident was assessed for the use of that assistive device.

Homes Act, 2007**

A Registered Practical Nurse #102 who attended the incident, confirmed that one Personal Support Worker (PSW) was giving the resident care that specific date when the resident had a fall sustaining an injury. Also confirmed that resident #001 needed assistive devices for safety.

Two Personal Support Workers #103 and #104 confirmed that resident #001 is totally dependent on others, that assistive devices were used for safety and that the resident needed two people to assist with her care.

The Director of Care #101 confirmed in an interview that although safety risks were addressed for this resident when using the assistive devices, the resident was not assessed for safety with the assistive device used on that specific date. The plan of care did not include fall safety risks with interventions to be used while the resident was being cared for. [s. 26. (3) 19.]

1. The licensee has failed to ensure that the care set out in the plan of care was provided to the resident as specified in the plan.

A review of resident #001's clinical record progress notes revealed that the resident had a fall from an assistive device, on a specific day, while a Personal Support Worker was providing care.

A review of the post fall assessment revealed that the resident sustained an injury, that care was provided, one staff was present during the fall, the physician was contacted and the resident was sent to the hospital.

A review of resident #001's plan of care revealed the following: "Two persons; total dependence".

A Registered Practical Nurse #102 who attended the incident, confirmed that one Personal Support Worker (PSW) was giving the resident care, on that specific date, and had a fall sustaining an injury.

In an interview with the Director of Care #101 and the Administrator #100 confirmed that two persons were needed to help the resident with her care and that on a specific date, only one PSW was assisting the resident. They confirmed that it was the home's expectation that staff would provide the care that is set out in the care plan.

The scope of this issue is isolated to this one resident, there is an ongoing non compliance history of this section being issued in the home. The severity is determined to be a level 3 as the resident sustained an injury. (615)
