safe temperatures and prepare and deliver meals and snacks, equipment required to store drugs at safe temperatures and to prepare and deliver drugs, the resident-staff communication and response system, elevators and life support, safety and emergency equipment. O. Reg. 246/22, s. 22 (1); O. Reg. 66/23, s. 2.

The inspector is ordering the licensee to comply with a Compliance Order [FLTCA, 2021, s. 155 (1) (a)]:

The licensee shall:

- a) Ensure the home is served by one or more onsite generator(s) that are available at all times and have a combined capacity to maintain function to all requirements and equipment pursuant to O. Reg. 246/22, s. 22 (1).
- b) Once a generator has been installed, provide written documentation by a contracted service provider (e.g. electrician) that the generator has the capacity to maintain all services and equipment required by the legislation. Documentation by the contracted service provider must include detailed verification that the generator has capacity to maintain all services required, the date, and is signed and/or stamped by the contracted service provider who provided the verification. This document must be kept on site and must be made available upon request by an Inspector.

Grounds

The home was served by a 7kW gas powered generator that did not have capacity to power and maintain function to all requirements and equipment pursuant to O. Reg. 246/22, s. 22 (1).

Additionally, the generator did not provide power to the heating system, emergency lighting in the hallways or corridors, the fridges in the kitchen, or pumps related to the fire safety system.

Failure to ensure the on-site generator had the capacity to maintain essential services, and was connected to all required services, put residents' safety, comfort, and well-being at risk.
