Loi de 2007 sur les foyers de
soins de longue durée

1. The licensee did not ensure that there was a written plan of care for residents that set out clear directions to staff and others who provide direct care to the residents.

A) Resident #002 had pain and required assistance with care from staff. The resident's plan of care indicated the resident required assistance but did not provide clear directions to staff on how to provide care to this resident. Staff confirmed that they provide care in a way to avoid causing pain to the resident. It was confirmed by the RAI-Co-ordinator that this information was not included on the resident's plan of care.

B) Resident #001 was identified as having responsive behaviours sometimes triggered by co-residents and staff getting into the resident's personal space. The Behavioural Support of Ontario staff recommended an intervention to prevent co-residents from entering the resident's room and to keep the door closed when resident #001 is out of the room. These directions were not included in the resident's plan of care. [s. 6. (1)]

Additional Required Actions:

VPC - pursuant to the Long-Term Care Homes Act, 2007, S.O. 2007, c.8, s.152(2) the licensee is hereby requested to prepare a written plan of correction for achieving compliance , to be implemented voluntarily.

1. The licensee did not ensure that the plan of care was based on at a minimum, interdisciplinary assessment of health conditions, including allergies, pain, risk of falls and other special needs.

A) Staff indicated that resident #002 is occasionally resistant to care due to pain. Staff confirmed that they provide care in a way to avoid causing way to the resident. The resident's plan of care did not identify that resident #002 had pain and required interventions for staff to provide care without causing pain.

B) Resident #001 was assessed as having pain and received routine and as needed (PRN) analgesics. According to the clinical records, resident #001 complained of pain intermittently and was being assessed four times a day to monitor the resident's level of pain.

Resident #001's plan of care did not identify pain as a focus.

C) On an unidentified date in 2013, it was documented in resident #001's clinical records that resident #001 had an allergic reaction to a medication. The resident's plan of care was not updated to include this medication as an allergy. [s. 26. (3)]
