**Specifically failed to comply with the following:**

**s. 30. (2) The licensee shall ensure that any actions taken with respect to a resident under a program, including assessments, reassessments, interventions and the resident's responses to interventions are documented. O. Reg. 79/10, s. 30 (2).**

**Findings/Faits saillants :**

1. The licensee failed to ensure that any actions taken with respect to a resident under a program, including assessments, reassessments, interventions and the resident's responses to interventions were documented.

The home's Skin and Wound Care Program, Policy LTC-E-90, indicates the following under documentation/monitoring:

The Treatment Observation Record (TOR)-Ongoing Wound Assessment is completed with every dressing change, but minimum every 7 days.

Clinical record review for three residents revealed wound assessments were not documented on all required occasions.

The Administrator and Wound Care Champion Registered Nurse confirmed the expectation is that all wounds have a wound assessment documented weekly. [s. 30. (2)]

**Findings/Faits saillants :**

1. The licensee failed to ensure that a plan, policy, protocol, procedure, strategy or system instituted or otherwise put in place was complied with.

The review of three resident health care records, observations and interviews with a registered staff member confirmed these residents used side rails/assist rails when in bed. During the RQI, the Administrator provided the home's policy and procedures related to side rail use.

The Administrator confirmed the home's policy, LTC-K-10-ON titled, "Side Rails", indicates:

"All resident's using side rails will be assessed for the need of side rails and the associated risk with the utilization of side rails using LTC-K-10-05-ON - Side Rail and Alternative Equipment Decision Tree".

The Administrator confirmed this form had not been used to assess resident risk when bed rails are used for any resident per the LTCH's policy. [s. 8. (1) (b)]

1. The licensee has failed to ensure where bed rails were used, the resident had been assessed and his or her bed system evaluated in accordance with evidence-based practices, and if there are none, in accordance with prevailing practices to minimize risk to the resident.

A review of one resident's health care record, bed observations, a PSW and a Registered staff member confirmed this resident uses two assist bed rails when in bed. This resident's bed system had been evaluated for entrapment risks in December 2011. The mattress make on the bed entrapment assessment did not match the mattress currently on the bed for this resident. The Administrator confirmed this resident's current bed system has not been assessed for safety and entrapment zones when the mattress when changed. (516)

A review of one other resident's health care record and observations confirmed this resident used bed rails. The Administrator confirmed this resident's bed system has not been evaluated and this resident has not been assessed for bed entrapment risks. (518) [s. 15. (1) (a)]

1. The licensee failed to ensure that a resident exhibiting altered skin integrity, including skin breakdown, pressure ulcers, skin tears or wounds, received a skin assessment by a member of the registered nursing staff, using a clinically appropriate assessment instrument that was specifically designed for skin and wound assessment.

A health care record review for one resident indicated this resident exhibited altered skin integrity.

The home's policy, Revere Skin and Wound Care Program indicates the following:

The Treatment Observation Record (TOR) - Initial Wound Assessment, is initiated when a resident has any open area/wound. One TOR for each open area/wound will be completed. The Treatment Observation Record (TOR) - Ongoing Wound Assessment is completed with every dressing change, but minimum every 7 days.

The inspector was unable to locate an Initial Wound Assessment/Treatment Observation Record or an Ongoing Assessment/Treatment Record.

It was verified by the Wound Care Champion Registered Nurse that the identified forms were not completed and that it is the expectation that a resident exhibiting altered skin integrity received a skin assessment by a member of the registered nursing staff, using a clinically appropriate assessment instrument that is specifically designed for skin and wound assessment. (537) [s. 50. (2) (b) (i)]

2. The licensee failed to ensure a resident exhibiting altered skin integrity, including skin breakdown, pressure ulcers, skin tears or wounds had been assessed by a registered dietitian who is a member of the staff of the home.

A health care record review for one resident indicated this resident exhibited altered skin integrity. The health care record review for this resident also revealed a referral to the Nutritional Care/Registered Dietitian (RD) was not completed for this resident exhibiting altered skin integrity.

The Wound Care Champion Registered Nurse verified that a referral to the Nutritional Care/Registered Dietitian (RD) had not been initiated. (537) [s. 50. (2) (b) (iii)]
