1. The licensee did not ensure that the care set out in the plan of care for one resident was based on an assessment of the resident and the needs and preferences of that resident. Review of one resident's health record confirmed documentation related to a joint physiotherapy and occupational therapy assessment for transfers & toileting. The assessment recommended trial use of a specific type of equipment. The residents family was informed the trial was successful. Six staff confirmed the equipment was not provided for the resident as recommended. [s. 6. (2)]
