1. The licensee did not ensure that all staff participate in the infection prevention and control program during the influenza administration to residents.

Hand hygiene was not always practiced between resident contact while providing intramuscular injections.

Staff verified that alcohol based hand sanitizer was available, but not always used between resident contact.

The homes infection control policy Hand Hygiene #I-1(A) identifies The "4 moments for hand hygiene" in health care:

1. Before initial resident/resident environment contact.
2. Before aseptic techniques.
3. After body fluid exposure.
4. AFTER patient/patient environment contact.

The home confirmed that it is an infection control expectation that hand hygiene be practiced by all staff during patient contact and when injections are being administered. [s. 229. (4)]
