1. The licensee has failed to ensure that the plan of care set out clear direction to staff and others who provided direct care to the resident.

Resident #001 used a tilt wheelchair. The written plan of care included documentation regarding the fact that the chair is a Personal Assistive Device, but did not provide direction to staff regarding the degree of tilt of the chair, the frequency with which the chair was to be tilted, or times that the resident would have benefited from having the chair tilted.

During interviews with Personal Support Workers, they stated that they do not reference the written plan of care. They stated that they receive information from shift report, the Personal Care Profile - Quarterly that was located in front of the resident's flowsheet and from their co-workers.

The Personal Care Profile did not indicate that Resident #001 used a tilt wheelchair. Specific instructions regarding positioning were not indicated on the profile. [s. 6. (1) (c)]

2. Resident #001 experienced a significant change in mobility status.

Following treatment by a physician, specific instructions were ordered. On three occasions, the inspector observed Resident #001 and these instructions were not implemented.

[s. 6. (7)]

3. The licensee failed to ensure that the provision of the care set out in the plan of care was documented.

The plan of care for Resident #001 provided direction for bathing preferences.

A review of Resident #001's medical record revealed that on two occasions, baths were not documented. A review of the progress notes did not provide reasons for the missed bath, or direction for re-scheduling.
