Infection Prevention and Control  
Falls Prevention and Management

## INSPECTION RESULTS

### WRITTEN NOTIFICATION: Missing weekly skin and wound assessment

**NC #001 Written Notification pursuant to FLTCA, 2021, s. 154 (1) 1.**

Non-compliance with: O. Reg. 246/22, s. 55 (2) (b) (iv)

The licensee has failed to ensure that any resident exhibiting altered skin integrity was reassessed at least weekly by a member of the registered nursing staff.

#### Rationale and Summary

A review of a resident's clinical record showed that the resident had an alteration in skin integrity. The home initiated weekly skin and wound assessments. There was one missing weekly skin and wound assessment.

The home's skin and wound care program directed registered nursing staff to reassess altered skin integrity at least weekly and as needed.

During an interview with the Skin and Wound Lead, they confirmed that the skin and wound assessments should have been completed weekly per the home's policy.

**Sources:** Resident's clinical record; Skin and Wound Care Program; and interview with Skin and Wound Lead.

## WRITTEN NOTIFICATION: Behaviours & Altercations

### NC #002 Written Notification pursuant to FLTCA, 2021, s. 154 (1) 1.

Non-compliance with: O. Reg. 246/22, s. 60 (b)

The licensee failed to ensure that staff were made aware at the beginning of the shift that a resident had required heightened monitoring during previous shifts due to responsive behaviours.

A review of the resident's clinical record for previous shifts indicated that registered staff requested heightened monitoring due to responsive behaviours.

During an interview with a registered staff, they stated they were not made aware that there was heightened monitoring for a resident due to responsive behaviours on previous shifts.

The Assistant Director of Nursing stated the expectation is for direct care staff to make the oncoming staff aware at the beginning of each shift when a resident is on heightened monitoring.
