1. On February 7, 2013, Inspector 151 did a walk-through of the home. Inspector observed an unlocked treatment care cart in the hallway with the keys in the lock, cart unattended and out of view by any staff person. Inspector was able to peruse through the drawers and to find, in the bottom drawer, 3 bottles of hazardous substance Dovidine (Iodine base wound cleanser - toxic if swallowed). Inspector waited for the worker to return and pointed out the situation. This staff person affirmed that the home did have a protocol in regards to locking unattended care carts and that, in this instance, the process was not followed. The licensee did not ensure that the home is a safe and secure environment for its residents. [s. 5.]
