**Findings/Faits saillants :**

1. The inspector reviewed a Critical Incident involving responsive and alleged inappropriate behaviours. On April 2, 2014 inspector #575 interviewed staff member #100 regarding the process for monitoring and reporting a responsive behaviour. The staff member stated that if a resident exhibits a responsive behaviour the PSW is to document on the resident's flow sheet and tell a registered staff member who then creates a progress note explaining the details of the incident. The progress note is then communicated to the registered staff on the next shift via the shift report created on Point Click Care. The registered staff is required to provide a verbal report to staff before the next shift. On April 2, 2014 the inspector interviewed two additional staff members (#200 and #300) who confirmed that any behaviours that are documented on the flow sheet are to be communicated to the registered staff who would then create a progress note. On April 4, 2014 the inspector reviewed the resident's flow sheets over an approximately 2 month period and it was identified that behaviours were exhibited by the resident on multiple occasions, however only one of the responsive behaviours incidents was documented in the progress notes.

The licensee did not ensure that the matters referred to in subsection (1), specifically regarding internal reporting protocols for responsive behaviours, are implemented in accordance with evidence-based practice and, if there are none, in accordance with prevailing practices. [s. 53. (3) (a)]
