Ce qui suit constitue un avis écrit de non-respect aux termes du paragraphe 1 de l'article 152 de la LFSLD.

WN #1: The Licensee has failed to comply with O.Reg 79/10, s. 131. Administration of drugs

Specifically failed to comply with the following:

s. 131. (2) The licensee shall ensure that drugs are administered to residents in accordance with the directions for use specified by the prescriber. O. Reg. 79/10, s. 131 (2).

1. The licensee failed to ensure that drugs were administered to residents in accordance with the directions for use specified by the prescriber.

During a previous inspection, # 2015_281542_0013, a compliance order was issued for s.131.

Inspector #542 completed a review of the home's medication incident reports for September 2015 and October 2015.

It was documented that in September, seven medication errors were made. Of these seven, five were omissions by the nurse, indicating that the resident did not receive their ordered medications. Two residents were administered the wrong doses of their medications.

During the month of October, nine medication errors were made, six were omissions indicating that the resident did not receive their ordered medications.

The medication incident reports revealed that two residents did not have medication reconciliation completed for them on admission by the physician. Additionally the incident reports showed that one resident received the wrong anticoagulant dosage.

Inspector #542 completed a review of the training records that were provided by the Acting Director of Care. It was noted that eight out of 16 registered staff documented that they had completed the training on the home's policy titled "Medication System Improvement." Therefore eight of the registered staff had not completed the required training as previously issued in a compliance order. All eight of the registered staff that did not receive the training on the home's policy worked in the home administering medications on numerous occasions up to this date.

Inspector #542 met with the Acting Director of Care who also verified that none of the agency registered staff received the training on the home's policy.

The decision to re-issue this compliance order was based on the severity which indicates a potential for actual harm to the residents of the long-term care home. The scope represented that there was a pattern of medication errors and the home has a previous compliance order related to this area. [s. 131. (2)]
