A critical incident (CI) system report was submitted to the Director regarding a medication incident where a specific resident did not receive prescribed medication over several days.

Diagnostic tests were to be completed and the resident was prescribed a medication. The resident was reassessed a few days later and a new medication was prescribed. External agencies were to provide nursing support for the medication administration. The electronic medication administration record (eMAR) and progress notes showed the resident did not receive their prescribed dose on a number of dates, and was transferred to hospital.

The resident was hospitalized and received treatment.

The DOC said registered staff should have notified the nurse practitioner or physician on call when the resident did not receive the prescribed medication and had worsening symptoms.
