Findings/Faits saillants :

1. The licensee failed to ensure that the following rights of residents are fully respected and promoted: ii. give or refuse consent to any treatment, care or services for which his or her consent is required by law and to be informed of the consequences of giving or refusing consent [s.3(1)11.ii]

An identified resident was seen by a specialist and recommendations made to have medication added to the resident medication regimen. Interview with the resident's Power of Attorney (POA) indicated that the home did not request consent for the specialist referral or the administration of the new medications. The medication was ordered by the registered staff and administered to the resident. Review of the resident's clinical chart, progress notes and Physician's order forms did not show evidence that the POA was contacted as the resident is unable to consent for treatment due to cognitive impairment prior to the specialist referral or when new medication was initiated to obtain consent.

WN #2: The Licensee has failed to comply with LTCHA, 2007 S.O. 2007, c.8, s. 6. Plan of care

Specifically failed to comply with the following subsections:

s. 6. (10) The licensee shall ensure that the resident is reassessed and the plan of care reviewed and revised at least every six months and at any other time when,

(a) a goal in the plan is met;

(b) the resident's care needs change or care set out in the plan is no longer necessary; or

(c) care set out in the plan has not been effective. 2007, c. 8, s. 6 (10).

Findings/Faits saillants :

1. The licensee failed to ensure that the plan of care for the resident was reviewed and revised to reflect the changes in the resident's health status and assessed needed. [s.6(10)(b)]

The plan of care for an identified resident was not revised to reflect the changes in her health status related to the resident's skin.

Resident sustained a skin tear. Interview with registered staff, review of the clinical chart and observation of the resident's skin indicated the skin tear had healed. However, the plan of care reviewed did not indicate that the resident's skin had healed and no further interventions were required.
